

Capturing the Problem with DPO Toolbox

SAVE MONEY

Use the ServiceNow solution you already have

DOCUMENT & LOG

Documentation of all your DPIA's with full audit trail.

REDUCE COMPLEXITY

Collect all your GDPR data in the same tool, and reduce the GDPR Complexity

THE CHALLENGE

GDPR is in effect not only in the EU, but also in the rest of the world from the 25th of May 2018.

Companies are struggling to get their privacy notices, statements, data flows and systems in place before that.

But where should you store it? Excel? Or in a stand alone system without enterprise integrations?

GDPR is putting a heavy load on your knowledge of your infrastructure. Most of this you might already have in ServiceNow, so why not register your GDPR data and DPIA's in ServiceNow as well?

YOUR BENEFITS

- Everyone involved in the process saves time
- Developed by Certified Privacy Professionals
- Misunderstandings are reduced
- Easy for the user

Make sense

OUR SOLUTION

BusinessNow has developed the DPO Toolbox, for your data and privacy needs.

The main module is a DPIA registration form with ties into your CMDB, Company, Project, Business Processes, Change Management processes and tables. Furthermore, it is a module for reporting Data Breach Incidents. Here you can register all decisions and details required of an incident involving a data breach.

The solution can support your GDPR compliance and is a perfect match, if you are utilising the GRC and Vendor Risk Management modules in ServiceNow.

NOT A GRC USER?

Even if you are not using ServiceNow GRC Suite modules, the DPO Toolbox replaces your excel sheets and takes advantages of the enterprise capabilities of ServiceNow.

DPIA's are mandatory in GDPR - the DPO Toolbox supports your needs.
